

## The Challenge

Carmeuse turned to Nexio Projects for support to further develop their sustainability program as the team quickly realized that it was a complex puzzle to solve.

## The Solution

- ✓ A gap analysis to identify the existing and missing pieces of the puzzle
- ✓ EcoVadis assessment support
- ✓ A roadmap for the implementation

## The outcome

- ✓ From a Bronze medal to the EocoVadis Silver medal
- ✓ A mature sustainability program

## CASE STUDY

### Company Facts

- € >1 Billion Euros in revenue;
- 4,500 employees worldwide;
- North America & Canada locations;
- 60 (Silver) current EcoVadis ESG Score/Medal.

### The context

- ✓ Carmeuse Americas has become one of the leading suppliers of lime, limestone and other mineral products, equipment and engineering solutions;
- ✓ Due to Carmeuse's size and global reach, there were many moving parts and it proved difficult to gain a comprehensive and centralized overview of the main challenges at hand.

### Project Objectives

- ✓ Carmeuse wanted to make improvements to its overall sustainability strategy, rather than have individual pieces that didn't contribute to the bigger picture;
- ✓ The company had been working with EcoVadis for a few years and had used it to improve their sustainability program to the best of their ability. However, the results did not match their desired outcome.

“ Having outside council for the setup of the sustainability program is very valuable – having someone else look at what we're doing, showing us the improvements that we haven't thought about.

Chris Imbrogno, Environmental Director at Carmeuse Americas

### Key Outcomes

- ✓ The company went from a Bronze medal to the **EcoVadis Silver medal**
- ✓ **A sense of clarity** around the sustainability program
- ✓ **Time saved** by having the proper documentation

### Nexio Projects' Solution

- ✓ Nexio Projects Collaborated with the dedicated team at Carmeuse, starting with the completion of a gap analysis, which resulted in an overview of existing and missing pieces of the puzzle in the sustainability program;
- ✓ After identifying the gaps, the team worked on what we call an implementation;
- ✓ Policies were written and procedures were put into place.
