

Supporting Hanzestrohm to grown on their sustainability maturity curve

The Challenge

Hanzestrohm lacked insight into their current sustainability performance and therefore also their potential opportunities for improvement.

After completing the EcoVadis assessment they now decided to focus on greenhouse gas emissions.

The Solution

- ✓ A carbon footprint assessment for all entities
 - ✓ Identification of areas throughout the business where emissions can be reduced
 - ✓ Benchmarking
-

The outcome

- ✓ Hanzestrohm understands their carbon footprint and how to reduce it
 - ✓ Emission reductions opportunities that could reduce the company's carbon footprint by 31%
-

CASE STUDY

Company Facts

- € < 100 Million Euros in revenue;
- 135 employees;
- 4 business units;
- 60 current ESG Medal/Score.

The Wholesale of electronic machinery and equipment industry

- ✓ Electronic waste is the fastest growing waste stream globally and only 20% of it is being recycled;
- ✓ As part of their EcoVadis assessment and ambition to improve their sustainability, they required insight into their greenhouse gas emissions to find opportunities to reduce the carbon footprint of their operations.

Project Objectives

- ✓ Assess company-wide scope 1, 2 and 3 carbon emissions;
- ✓ Identify emissions hotspots;
- ✓ Benchmark emissions against competitors to gauge how they have been performing;
- ✓ Identify opportunities to reduce emissions.

HANZESTROHM

We have prioritized sustainability within our group of entities and see it as crucial to long-term success. As part of this ambition, we know we need to play our role to reduce greenhouse gas emissions. Nexio Projects' detailed Carbon Footprint Assessment Report shows us where our emissions hotspots are and provides us with the insight needed to reduce.

Gijs Hemmink, Hanzestrohm.

Key Outcomes

- ✓ Provided valuable insight and metrics that allows Hanzestrohm to **understand their carbon footprint and how to reduce it;**
- ✓ Identified multiple KPI's that will enable Hanzestrohm to **measure ongoing improvement;**
- ✓ Identified emissions reductions opportunities that could **reduce Hanzestrohm's carbon footprint by 31%.**

Nexio Projects' Solution

- ✓ Conduct a comprehensive carbon footprint assessment for all entities;
- ✓ Provide a detailed Carbon Footprint Assessment report;
- ✓ Identify areas throughout the business where emissions can be reduced;
- ✓ Benchmark their carbon footprint per employee against companies in similar industries to see where they stand.
