

Case study: COUNT

The Challenge

COUNT Energy Trading was looking for support to complete the EcoVadis Assessment to have its sustainability efforts certified by an external third party.

The Solution

Nexio Projects supported COUNT Energy Trading with an EcoVadis Assessment Review to make sure the company was able to achieve the score that best reflected its sustainability efforts.

After the Review, Nexio Projects supported COUNT Energy Trading with its Sustainability Annual Report.

The outcome

- EcoVadis Assessment Review
- Annual Sustainability Report
- Increased and shared confidence in the sustainability achievements of COUNT Energy Trading

Company Facts

Petrochemical & Energy

25 employees

EcoVadis Gold Medal

The context

- COUNT Energy Trading operates in the petrochemical sector and trades commodities, as well as specialising in renewable energy.
- The company faces the challenge of guaranteeing certain sustainability standards to its customers while being in the middle of the supply chain and thus having little control over production.

Project Objectives

- To support COUNT Energy Trading with the EcoVadis Assessment
- To obtain an EcoVadis medal that reflects the company's efforts and values
- To satisfy customer requests by achieving the desired EcoVadis score

Key Outcomes

- EcoVadis Gold Certification;
- Annual Sustainability Report.

Nexio Projects' Solution

- Nexio Projects supported COUNT Energy Trading with an EcoVadis Assessment Review
- The project increased the internal level of confidence in the sustainability efforts of the company
- The result of the assessment strengthened COUNT Energy Trading's ambition to continue working on this path.

“Nexio Projects provided a lot of guidance throughout the EcoVadis Assessment Review. The team helped us understand which priorities to focus on internally to benefit our sustainability journey.”

Ricardo Cordeiro de Sousa, Sustainability Officer at COUNT
