# Case study: Scholle IPN
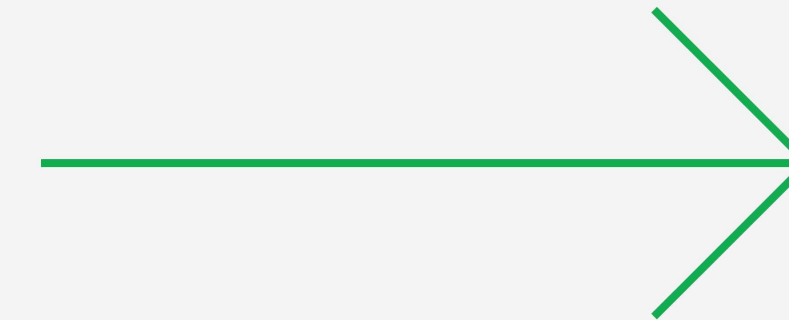

The Challenge

Scholle IPN Netherlands B.V. was looking for support to complete the EcoVadis Assessement with dedication and a more structured approach.

The Solution

Nexio Projects supported Scholle IPN Netherlands B.V. with an EcoVadis Assessment Review to improve their EcoVadis score and join their biggest customers on the road of sustainability.

The outcome

- EcoVadis Assessment Review
- Update of internal policies, procedures and reporting methodology
- Better understanding, especially at the board level, of the importance of sustainability

Company Facts

€ 50M in revenue

130 employees

Flexible packaging solutions

The context

- Scholle IPN is a global leader in flexible packaging solutions that range from barrier films to bag-in-box and pouch fillings.

- As for now, the assessment has been completed by the Jellinghaus plant based in the Netherlands.

- Sustainability is among the core values of the company, which strives to innovate and engineer packaging solutions with the idea of 'doing more with less'.

Project Objectives

- Facilitate the process of the EcoVadis Assessment

- Obtain an EcoVadis medal that reflects the company's efforts and values

- Satisfy client requests by achieving a higher EcoVadis score

Key Outcomes

- EcoVadis Certification;
- EcoVadis score improvement;
- Further development of internal policies and procedures;
- Stronger internal reporting of sustainability KPIs

Nexio Projects' Solution

- Nexio Projects supported Scholle IPN through an EcoVadis Assessment Review.

- The project raised awareness within the company with respect to the importance of sustainability.

- The project strengthened the internal procedures of the company and improved reporting by better defining KPIs on the various sustainability pillars.

"At Nexio Project, the team will always find the needed time to help. They provide clear and hands-on instructions that make the sustainability journey easy and understandable!"
