

Case study:

Ocean Network Express Europe Ltd

The Challenge

ONE had set out ambitious goals as part of their inland sustainability strategy across Europe and Africa. The team looked for support to verify and further structure their approach.

The Solution

Nexio Projects consulted them in selecting the appropriate tools to guide their strategy.

The team performed a gap analysis to identify opportunities for improvement and provide a roadmap to continue their sustainability journey.

The outcome

The report provided new insights for the ONE EUA inland team and brought increased structure to the roadmap and ESG strategy.

Company Facts

> €1 billion in revenue
Global HQ in Singapore
5 regional headquarters
Service covering more than 120 countries

The context

- ONE is a global container shipping company offering extensive liner network service covering over 100 countries;
- ONE had already set ambitious goals as part of their sustainability strategy for the marine transportation of containers and aims to properly structure the strategy for their inland transportation in the EU and Africa;
- The regional headquarters sought external verification of their sustainability management system to boost their green journey.

Project Objectives

- To bring increased structure to the sustainability strategy and outline the long term roadmap
- An advice on how to engage with multiple stakeholder on the sustainability journey.

Key Outcomes

- Increased insight into the shipping market, which enabled improved decision-making;
- Engagement with stakeholders in the value chain through interviews.
- the roadmap and longterm strategy and including key ESG topics such as ethics and social responsibility in line with their sustainability ambitions

Nexio Projects' Solution

- The team performed a gap analysis to identify areas for improvement and an advice on how to formulate the long term roadmap;
- Nexio Projects engaged with inland suppliers, clients and internal stakeholders through interviews to map the value chain.

“Sustainability is a high priority for ONE, especially the reduction of carbon emissions. After working on the gap analysis, we started various internal initiatives to engage our teams and implement new processes within the EUA region. With the support of Nexio Projects, we have a clearer picture of our roadmap for the future.”
