

# Case study: TRILUX

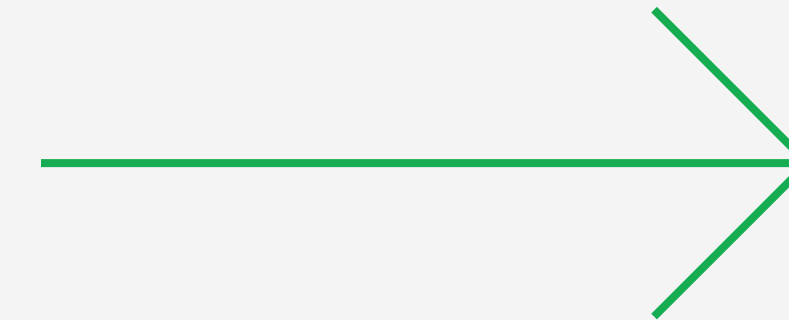

# The Challenge

TRILUX looked for support to make the process of completing their EcoVadis Assessment run smoothly.

# The Solution

Nexio Projects supported TRILUX in the completion of their EcoVadis Assessment by providing a better understanding of the documentation and necessary data. Working with the team provided more structure to the entire process.

# The outcome

- EcoVadis Assessment completed
- Improved the structural approach to ESG criteria
- A shift in the level of attention the company gives to sustainability KPIs

# Company Facts

€ 1 billion in revenue

---

5000 employees

---

Lighting Products

---

## The context

- TRILUX has been operating in the lighting industry since 1912.
- Social justice, ecological responsibility and fair business have been TRILUX's non-negotiable values from the start.
- TRILUX's sustainability strategy is built on three pillars:
  - Corporate Responsibility;
  - Innovation & Technology;
  - Circular Economy

## Project Objectives

- To facilitate the process of the EcoVadis Assessment.
- To ensure the company's sustainability efforts are reflected in the EcoVadis score. TRILUX works systematically to improve its carbon footprint and ESG criteria.
- To improve internal structure and the understanding of the EcoVadis methodology within the sustainability team.

## Key Outcomes

- As a result of the EcoVadis Assessment, TRILUX's Germany Headquarter was recognised with a Bronze Medal.
- The score places TRILUX among the top 50% companies ever evaluated by EcoVadis.

## Nexio Projects' Solution

- Nexio Projects consulted TRILUX in taking the EcoVadis assessment;
- The team helped them in understanding what documents to submit and how to respond to the questionnaire;
- Nexio Projects supported TRILUX in creating internal codes of conduct and reinforcing the responsibility initiatives along the supply chain.

**“Through working with Nexio Projects, we’ve gained a better understanding of the EcoVadis methodology. Internally, we now have much more structure when it comes to managing ESG”.**
